F-Series Circuit Breaker

The F-Series hydraulic/magnetic high amperage circuit breakers are designed to handle high current applications in extremely hot and/or cold locations. Due to its timeproven hydraulic/magnetic design, the F-Series load sensing mechanism is insensitive to changes in ambient or enclosure temperature, providing a consistent trip point over temperatures ranging from -40°C to +85°C. Additionally, the F-Series circuit breakers come with a choice of overload time delays, making them ideal for critical applications having inductive loads.

Further, the F-Series breakers are available up to 700A and an optional 25 millivolt metering shunt construction provides a safe method for monitoring current flowing through the breaker by simply connecting a meter with light gauge wire to the appropriate terminals located on the shunt housing at the rear of the breaker. Applications can be customized by measuring and displaying percentage of current, watts or safe/danger zones.

Features:

- AC ratings to UL 489
- DC voltage ratings up to 700A with metering shunt section
- Consistent trip point over temperatures ranging from -40°C to +85°C
- Optional 25 millivolt metering shunt construction

Applications:

- Ideal for applications under extreme temperatures
- Higher Amperage Applications
- Battery Disconnect Systems
- Solar Power Systems
- Military

Electrical

| Maximum Voltage Current Rating | 125VDC, 277 VAC Standard current coils: 100, 125, 150, 175, 225, 250 amps. 300, 350, 400, 500, 600, 700 amps available as parallel pole construction. |
|--|---|
| Auxiliary Switch Rating | SPDT; 10.1 Amps @ 250VAC, 1.0 Amps @ 65VDC, 0.5 Amps @ 80VDC 0.1 Amps @ 125VAC (with gold contacts). |
| Insulation Resistance Dielectric Strength | Minimum: 100 Megohms at 500 VDC 1960 VAC, 50/60 Hz for one minute between all electrically isolated terminals, except 2500 VAC for one minute between alarm/aux. switch and main terminals with contacts in open and closed position. F-Series circuit breakers comply with the 8mm spacing & 3750VAC 50/60 Hz dielectric requirements from hazardous voltage to operator accessible surfaces, between adjacent poles and from main circuits to auxilary circuits per Publications EN 60950 and VDE 0805. |
| Resistance, Impedance | Values from Line to Load Terminal - based on Series Trip Circuit Breaker. |

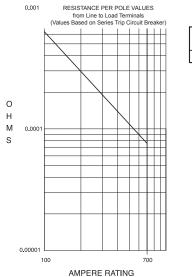

Mechanical

| Endurance Trip Free Trip Indication | 4000 ON-OFF operations with rated Current & Voltage & 4000 operations with no load (8000 operations total) @ 5 per minute. Parallel Pole construction: 1000 operations with rated Current and Voltage @ 5 per minute. All F-Series Circuit Breakers will trip on overload, even when the actuator is forcibly held in the ON position. The operating actuator moves positively to the OFF position when an overload causes the circuit breaker to trip. |
|---|--|
| Physical | |
| Number of Poles | 1 - 3 Poles Note: Ratings over 250 Amps only available with parallel pole. |
| Internal Circuit Config. | Series (with or without auxiliary switch), Switch Only (with or without auxiliary switch). |
| Available Accessories | Factory installed: DC Current Metering Shunt (25 mV @lr) |
| Weight | Varies depending on construction. Consult factory. |
| Standard Colors | Housing - Black; Actuator- Black or White with contrasting ON-OFF legend. |

Environmental

Designed and tested in accordance with requirements of specification MIL-PRF-55629 & MIL-STD-202 as follows:

| Shock | Withstands 100 Gs, 6ms, sawtooth while carrying rated current per Method 213, Test Condition "I". Instantaneous and |
|-----------------------|---|
| Vibration | ultra-short curves tested @ 90% of rated current. Withstands 0.060" excursion from 10- |
| VIDIALION | 55 Hz, and 10 Gs 55-500 Hz, at rated current per Method 204C, Test Condition A. Instantaneous and ultrashort curves |
| Moisture Resistance | tested at 90% of rated current. Method 106D; ten 24-hour cycles @ + 25°C to +65°C, 80-98% RH.56 days @ |
| Salt Spray | +85°C, 85% RH. Method 101, Condition A (90-95% RH @ 5% NaCl Solution, 96 hrs). |
| Thermal Shock | Method 107D, Condition A (Five cycles @ -55°C to +25°C to +85°C to +25°C). |
| Operating Temperature | / |
